British Museum Magazine The Griffith Institute
When the British Museum Friends decided they wanted to take their British Museum Magazine into a new direction, Thomas Manss & Company developed a design which gave the magazine a more popular presence. Rather than sparsely illustrated academic texts, the magazine design now matches generous photographs to in-depth editorial content.

Taxonomy of Australian Mammals utilises the latest morphometric and genetic research to develop the most up to date and comprehensive revision of the taxonomy of Australian mammals undertaken to date. It proposes significant changes to the higher ranks of a number of groups and recognises several genera and species that have only very recently been identified as distinct. This easy to use reference also includes a complete listing of all species, subspecies and synonyms for all of Australia's mammals, both native and introduced as well as terrestrial and marine. This book lays a foundation for future taxonomic work and identifies areas where taxonomic studies should be targeted, not only at the species and subspecies level but also broader phylogenetic relationships. This work will be an essential reference for students, scientists, wildlife managers and those interested in the science of taxonomy.

This book is an up-to-date comprehensive resource on the names (scientific, English and vernacular) of the mammals of South Asia. This work is first of its kind that deals with explanation of names of mammals at the species and subspecies level.

Snakes of the World: A Catalogue of Living and Extinct Species-the first catalogue of its kind-covers all living and fossil snakes described between 1758 and 2012, comprising 3,509 living and 274 extinct species allocated to 539 living and 112 extinct genera. Also included are 54 genera and 302 species that are dubious or invalid, resulting in reco
