CBAP(r) & CCBA Exam Prep Workbook Our CBAP Exam Prep Workbook is not a guide. It is rather a study aid. It's filled with exercises to help students better understand the BABOK by way of memory jogger, comprehension assessment and practice exam questions. Our workbook does not repeat or explain the BABOK, it supplements the BABOK or other study guides. It ensures that those studying for the CBAP have a way to assess their knowledge and better prepare for the exam. Description Comprehensive study aid designed to help you master the BABOK(r) to ultimately pass IIBA(r) certifications. Ace your CBAP(r) or CCBA certification exam on the first try!!! Contains: Fill in the blank exercises to assess your knowledge Matching exercises to jog your memory Exercises to help you understand the relationships between the tasks, techniques and other components of the BABOK(r) Guide, version 2.0. Crossword puzzles to help you learn and retain the key terms Over 300 practice questions for each knowledge area One 150 questions exam simulation Answer keys with references to BABOK(r) Guide, version 2.0 Bonus: 15 days access to our online exam simulation Use this workbook when studying for IIBA(r) exams to keep you organized and focused while learning, understanding and retaining the concepts of the BABOK(r) Guide, version 2.0. BA Mentor A company dedicated to helping professionals reach their goals of certification. Our current focus is on Business Analysis certification created by IIBA(r). With our tools and study aids we guarantee that you will pass the CBAP(r) or CCBA Exams. Testimonials "This workbook allowed me to link information that seemed so fragmented before! It brought all the concepts together in a structured way that helped me better understand the BABOK(r)." " Rose Ha " I am a big fan of writing and self-study approaches to absorbing new information. Linda and Camille's self-guided workbook is exactly the kind of resource I wish was available when I started my CBAP(r) prep process. " Laura Brandenburg, CBAP " "If you want to pass the CBAP(r)/CCBA exams on your first attempt then this is the book you for you. This workbook is all you need for your exam preparation. I wish I had this book when I was preparing for my CBAP(r) certification." Jayesh Jain, CBAP Agilist and Senior Business Analyst Auckland, New Ze

This volume in the Business Analysis Professional Development Series is the companion workbook to Mastering Business Analysis Standard Practices. Designed for instructors, trainers, and students, this supplemental workbook should be used in conjunction with the main text and enables readers to practice the seven-step business analysis process they are learning with a realistic case study, exercises, and suggested solutions. It helps facilitate self-learning and course instruction effectively where users can engage the processes before applying the tools and techniques on their own projects. Key Features - Presents a structured step-by-step process for performing business analysis that any new or experienced practitioner could follow, rather than having to piece the process together themselves - Demonstrates how to plan the business analysis work effort and develop and execute communication and information management plans - Shows how to set up a project for success with a clear and concise scope definition boundary, maintain agreement on scope, and control scope in an ever-changing environment

This volume in the Business Analysis Professional Development Series presents all the standard practices for performing business analysis work across seven steps, five perspectives, and 74 techniques. It will help business analysts at all levels further develop their skills and capabilities and master the next, or intermediate, level of competency in business analysis needed to advance their careers. This reference provides valuable guidance to everyone who performs BA work, uses BA deliverables, reviews or approves BA deliverables, or manages or mentors BA practitioners. It will help readers comprehend the BA role, responsibilities, and deliverables that ensure business analysis success. For instructors, trainers, and students, the supplemental Mastering Business Analysis Standard Practices Workbook, designed to be used in conjunction with the main text, enables readers to practice the seven-step process they are learning with a realistic case study, exercises, and suggested solutions. It helps facilitate self-learning and course instruction effectively where users can engage the processes before applying them on their own projects. Key Features* Presents a structured step-by-step process for performing business analysis that any new or experienced practitioner could follow, rather than having to piece the process together themselves * Addresses stakeholder identification and thoroughly examines stakeholder analysis and management to ensure a deep understanding before planning or engaging stakeholder involvement* Discusses how to perform situational needs analysis and prepare situational justification for decision makers within the business context* Demonstrates how to plan the business analysis work effort and develop and execute communication and information management plans* Shows how to set up a project for success with a clear and concise scope definition boundary, maintain agreement on scope, and control scope in an ever-changing environment* Provides detailed guidance on developing solution requirements and design definition for building the solution to meet stakeholder needs* Details the business analysis practitioner's role as the solution is being built; throughout the solution's existence; and after to ensure proper value is achieved* Defines BA and project management collaboration opportunities that lead to successful solution results* Covers business analysis terminology, roles and responsibilities, perspectives, competencies, and the expanded multi-level career path of a business analyst* WAV offers downloadable Business Analysis Referenced Templates--available from the Web Added Value Download Resource Center at www.jrosspub.com

This volume presents a detailed explanations of business analysis concepts, terms, tasks, and techniques, and includes examples to help readers understand how to apply them to real-world situations. It also delineates the key activities that are core to the BA role and the diverse range of activities analysts perform based on their career competency level, ranging from problem solving and identification of business opportunities, to complex systems thinking and solution development, to strategic planning and change management. It is a must-have reference for BA generalists, specialists, and hybrids at every career level and industry segment or perspective.

The development of business analysis as a professional discipline has extended the role of the business analyst who now needs the widest possible array of tools and the skills and knowledge to be able to use each when and where it is needed. This book provides 72 possible techniques and practical guidance on how and when to apply them.

The Business Analysis Competency Model(R) version 4 is a research and reference guide that provides the foundational information business analysis professionals need to continuously develop skills in real-time in order to meet the needs of organizations and for career growth.

Organisations face many challenges, which induce them to perform better, and thus to establish mature (or excellent) business processes. As they now face globalisation, higher competitiveness, demanding customers, growing IT possibilities, compliancy rules etc., business process maturity models (BPMs) have been introduced to help organisations gradually assess and improve their business processes (e.g. CMMI or OMG-BPM). In fact, there are now so many BPMs to choose from that organisations risk selecting one that does not fit their needs or one of substandard quality. This book presents a study that distinguishes process management from process orientation so as to arrive at a common understanding. It also includes a classification study to identify the capability areas and maturity types of 69 existing BPMs, in order to strengthen the basis of available BPMs. Lastly it presents a selection study to identify criteria for choosing one BPM from the broad selection, which produced a free online selection tool, BPM Smart-Selector.
