In the Days of the Comet is a 1906 science fiction novel by H.G. Wells in which the vapors of a comet are used as a device which brings about a profound and lasting transformation in the attitudes and perspectives of humankind. Reproduction of the 1906 First Edition.

WINNER OF THE EDWARD STANFORD CHILDREN'S TRAVEL BOOK OF THE YEAR 2022 A SUNDAY TIMES CHILDREN'S BOOK OF THE WEEK Dive beneath the waves with this spell-binding adventure of friendship, forgiveness and bravery, set on the shores of Papua New Guinea, perfect for fans of Katherine Rundell and Eva Ibbotson. "I want to be able to call the sharks. Teach me the magic and show me the ways." Blue Wing is desperate to become a shark caller, but instead she must befriend infuriating newcomer Maple, who arrives unexpectedly on Blue Wing's island. At first, the girls are too angry to share their secrets and become friends. But when the tide breathes the promise of treasure, they must journey together to the bottom of the ocean to brave the deadliest shark of them all... "The most incredible story...tender and wise, with themes of friendship, love, grief, revenge and acceptance." Michelle Harrison "Magnificent and beautiful." Sophie Anderson

If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of Vibrant Architecture (De Gruyter, 2015), Star Ark: A Living, Self-Sustaining Spaceship (Springer, 2017), and Soft Living Architecture: An Alternative View of Bio-informed Design Practice (Bloomsbury, 2018).

120 incredible, moving photographs that reveal the power of photographyCurated by leading gallerist, Peter Fetterman"When I photograph, I project what I'm not. What I would like to be." - Lillian BassmanThe power of photography lies in its ability to ignite emotions across barriers of language and culture. This selection of iconic images, compiled by pioneering collector and gallerist Peter Fetterman, celebrates the photograph's unique capacity for sensibility. Peter has been championing the photographic arts for over 30 years. He runs what is arguably the most important commercial photography gallery in the world. During the long months of lockdown, Peter 'exhibited' one photograph per day, accompanied by inspirational text, quotes and poetry. This digital collection struck a chord with followers from around the world. The Power of Photography presents 120 outstanding images from the series, along with Peter's insightful words. This carefully curated selection offers an inspiring overview of the medium while paying homage to masters of the art. From the bizarre Boschian fantasies of Melvin Sokolsky to the haunting humanity of Ansel Adams's family portraits; from Miho KajioKa's interpretation of traditional Japanese aesthetics of to the joyful everyday scenes of Evelyn Hofer; from rare interior shots by famed nude photographer Ruth Bernhard to Bruce Davidson's wistful depiction of young men playing ballgames on a street; this book gathers some of the most unique and heartening photographs from the 20th century. Each image is a time capsule, offering us a glimpse into days gone past. Yet each photograph also speaks of tranquillity, peace, and hope for the future.

In a bravura feat of storytelling, Mark Haddon calls upon narratives ancient and modern to tell the story of Angelica, a young woman trapped in an abusive relationship with her father. When a young man named Darius discovers their secret, he is forced to escape on a boat bound for the Mediterranean. To his surprise he finds himself travelling backwards over two thousand years to a world of pirates and shipwrecks, of plagues and miracles and angry gods. Moving seamlessly between the past and the present, Haddon conjures the worlds of Angelica and her would-be savior in thrilling fashion. As profound as it is entertaining, The Porpoise is a stirring and endlessly inventive novel from one of our finest storytellers.

This book offers a fascinating account of the life and scientific achievements of Giovanni Domenico Cassini, or Cassini I, the most famous astronomer of his time, who is remembered today especially for his observations of the rings and satellites of Saturn and his earlier construction of the great meridian line in the Basilica of San Petronio in Bologna. The various stages of his life are recounted in an engaging style, from his early childhood in Perinaldo and his time at the famous Jesuit College in Genoa, to his later experiences in Bologna and Paris. The emphasis, however, is on the scientific side of his life. The book explores his impressive body of work in diverse fields while also drawing attention to the international character of his endeavors, the rigor of his research, and his outstanding management skills, which combined to make him an early embodiment of the “European scientist.” It was also these abilities that gained him the attention of the most powerful king in Europe, Louis XIV of France (the “Sun King”), under the auspices of whom he set up the Paris Observatory in 1671. He would go on to serve as Director of the Observatory, where he would make the majority of his scientific discoveries, for the rest of his life.

The Princeton Guide to Evolution is a comprehensive, concise, and authoritative reference to the major subjects and key concepts in evolutionary biology, from genes to mass extinctions. Edited by a distinguished team of evolutionary biologists, with contributions from leading researchers, the guide contains some 100 clear, accurate, and up-to-date articles on the most important topics in seven major areas: phylogenetics and the history of life; selection and adaptation; evolutionary processes; genes, genomes, and phenotypes; speciation and macroevolution; evolution of behavior, society, and humans; and evolution and modern society. Complete with more than 100 illustrations (including eight pages in color), glossaries of key terms, suggestions for further reading on each topic, and an index, this is an essential volume for undergraduate and graduate students, scientists in related fields, and anyone else with a serious interest in evolution. Explains key topics in some 100 concise and authoritative articles written by a team of leading evolutionary biologists Contains more than 100 illustrations, including eight pages in color Each article includes an outline, glossary, bibliography, and cross-references Covers phylogenetics and the history of life; selection and adaptation; evolutionary processes; genes, genomes, and phenotypes; speciation and macroevolution; evolution of behavior, society, and humans; and evolution and modern society

This book investigates nominal determination in Old English and the emergence of the definite and the indefinite article. Analyzing Old English prose texts, it discusses the nature of linguistic categorization and argues that a usage-based, cognitive, constructionalist approach best explains when, how and why the article category developed. It is shown that the development of the OE demonstrative 'se' (that) and the OE numeral 'an' (one) should not be told as a story of two individual, grammaticalizing morphemes, but must be reconceptualized in constructional terms. The emergence of the morphological category ‘article’

follows from constructional changes in the linguistic networks of OE speakers and especially from 'grammatical constructionalization' (i.e. the emergence of a new, schematic, mostly procedural form-meaning pairing which previously did not exist in the constructicon). Next to other functional-cognitive reasons, the book especially highlights analogy and frequency effects as driving forces of linguistic change.

Eighteen-year-old Fern's life spirals out of control after troubled former child star Ivy Avila arrives on Commodore Island, ultimately forcing Fern to take agency over her own existence.
