Selected as an Outstanding Academic Title by Choice Magazine, January 2010 Classroom talk, by which children make sense of what their peers and teachers mean, is the most important educational tool for guiding the development of understanding and for jointly constructing knowledge. So what practical steps can teachers take to develop effective classroom interaction? Bringing together leading international researchers and drawing on the pioneering work of Douglas Barnes, this book considers ways of improving classroom talk. Chapters cover: - classroom communication and managing social relations; - talk in science classrooms; - using critical conversations in studying literature; - exploratory talk and thinking skills; - talking to learn and learning to talk in the mathematics classroom; - the 'emerging pedagogy' of the spoken word. With an accessible blend of theory, research and practice, the book will be a valuable resource for teachers, teacher-trainers, policy makers, researchers and students.

Globalization has fueled the growth of entrepreneurship. Starting a new venture involves risk taking as well as capital investment. This book delves into all the varied aspects of entrepreneurship. The impact of economic policies, finances, opportunity and capacity are some of the topics covered in this text. It will prove beneficial to students, scholars, professionals, aspiring entrepreneurs, etc.

This book was developed in order to deliver a unit standards-based curriculum that is in line with the National Qualifications-Framework (NQF).

Written in the mid-fifteenth century, Pope Pius II ' s Commentaries are the only known autobiography of a reigning pontiff and a fundamental text in the history of Renaissance humanism. In this book, Emily O ' Brien positions Pius ' expansive autobiographical text within that century ' s contentious debate over ecclesiastical sovereignty. Presenting the Commentaries as Pius ' response to the crisis of authority, legitimacy, and relevance that was engulfing the Renaissance papacy, she shows how the Commentaries function as both an aggressive assault on the papal monarchy ' s chief opponents and a systematic defense of Pius ' s own troubled pontificate and his pre-papal career. Illustrating how the language, imagery, and ideals of secular power inform Pius ' apologetic self-portrait, *The Commentaries of Pope Pius II (1458–1464) and the Crisis of the Fifteenth-Century Papacy* demonstrates the role that Pius and his writings played in the evolution of the Renaissance papacy.

South Africa has made huge gains in ensuring universal enrolment for children at school, and in restructuring and recapitalising the FET college sector. However, some three million young people are not in education, employment or training and the country faces serious challenges in providing its youth with the pathways and support they need to transition successfully into a differentiated system of post-school education and training. Across nine evidence-based chapters, 17 authors offer a succinct overview of the different facets of post-school provision in South Africa. These include an analysis of the impact of the national qualifications system on occupational training, the impact of youth unemployment, the capacity of the post-school system to absorb larger numbers of young people, the relationship between universities and FET colleges, the need for more strategic public and private investment in skills development, and a youth perspective on education and training policy. The authors have a number of recommendations for improving the alignment between schooling, further education and training, and university education - interventions that could shape the future of our youth.
