The Grammar of the English Tense System forms the first volume of a four-volume set, The Grammar of the English Verb Phrase. The other volumes, to appear over the next few years, will deal with mood and modality, aspect and voice. The book aims to provide a grammar of tense which can be used both as an advanced reference grammar (for example by MA-level or postgraduate students of English or linguistics) and as a scientific study which can act as a basis for and stimulus to further research. It provides not only a wealth of data but also a unique framework for the study of the English tense system, which achieves great predictive and explanatory power on the basis of a limited number of relatively simple rules. The framework provided allows for an analysis of the semantics of individual tenses which reflects the role of tenses not only in locating situations in time relative to speech time but also in relating situations in time relative to one another to form temporally coherent discourse. Attention is paid to the relations between tenses. On the one hand, we can identify sets of tenses linked to particular temporal areas such as the past or the future. These sets of tenses provide for the expression of a system of temporal relations in a stretch of discourse in which all the situations are located within the same temporal area. On the other hand, there are many contexts in which speakers might in theory choose between two or more tenses to locate a situation (e.g., when we choose between the past tense and the present perfect to locate a situation before speech time), and the book examines the difference that a choice of one or the other tense may make within a discourse context. The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets, and finally to a detailed examination of tenses in, and tenses interacting with, temporal adverbials. Original data is used frequently throughout the book to illustrate the theory discussed.

This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. *English for Research: Usage, Style, and Grammar* covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every), word order, prepositions, acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. The book is cross-referenced with the following titles: • *English for Academic Research: Grammar Exercises* • *English for Academic Research: Vocabulary Exercises* • *English for Academic Research: Writing Exercises* • *English for Writing Research Papers* Adrian Wallwork is the author of more than 30 English Language Teaching (ELT) and English for Academic Purposes (EAP) textbooks. He has trained several thousand PhD students and researchers from 40 countries to prepare and give presentations. Since 1984 he has been revising research manuscripts through his own proofreading and editing service.
