Nikon Microscopes Models Review: Optiphot, Labophot Eclipse 50i and E100. From the time the first Nikon compound monocular microscopes were produced in 1917, Nikon microscopes continued to evolve over the next seven decades; in the late 1970s and early 1980s, they introduced the Optiphot and Labophot models. Many labs and schools still

For Nikon microscopes, there are at least two types of mercury lamphouse, one with the bulb horizontal, and the other vertical. There are also no less than three power supply connections, which must match the power supply. The bulbs themselves are fairly small arc lamps, being a little less than 4 inches long (100 mm).
