Occupational stress, coping and strain: The combined ...

with most research emphasizing personality traits or coping as a vulnerability/resistance factor (Wiebe & Smith, 1997). Personality is perhaps the more pervasive, in that it may influence stressor exposure, cognitive appraisal, coping, physiological reactivity and susceptibility to stress-related illness and disease (Code & Langan-Fox, 2001).

supervisors and unclear professional evaluations.

Personality and Occupational Stress in Elite Performers

Abstract. Models of occupational stress have often failed to make explicit the variable of control over the environment, as well as the role of job socialization in shaping personality characteristics and coping behaviours. This neglect has helped maintain the focus of stress reduction interventions on the individual.
