Oracle Database 12c Release 1 (12.1.0.2) New Features

By applying such collations to SQL operations, an application can perform string comparisons and matching in a case-insensitive way, independent of the language of the data. With the new Oracle Database 12 c Release 2 (12.2) ability to declare collations for columns, you can declare a column to always be compared in a case-insensitive way. The column collation, if not specified explicitly, is inherited from a table default collation, which in turn is inherited from a schema default collation.

Oracle Database 12c Release 2 (12.2) New Features

In Oracle Database 12c, we can define Table columns with SQL keyword IDENTITY This material is created by <http://techgoeasy.com/> and is for your personal and non-commercial use only. 12 Oracle 12c New Feature which is an American National Standards Institute (ANSI) SQL keyword. Which are auto-incremented at the time of insertion (like in MySQL).
