This Handbook explores the main themes and topics of the emerging field of Global Administrative Law with contributions by leading scholars and experts from universities and organizations around the world. The variety of the subjects addressed and the internationality of the Handbook's perspectives make for a truly global and multi-dimensional view of the field. The book first examines the growth of global administrations, their interactions within global networks, the emergence of a global administrative process, and the development of the rule of law and democratic principles at a global level. It goes on to illustrate the relationship between global law and other legal orders, with particular attention to regional systems and national

orders. The final section, devoted to the emergence of a global legal culture, brings the book full circle by identifying the growth of a global epistemic community. The Research Handbook on Global Administrative Law provides a contemporary overview of the nascent field in detailed yet accessible terms, making it a valuable book for university courses. Academics and scholars with an interest in international law, administrative law, public law, and comparative law will find value in this book, as well as legal professionals involved with international and supranational organizations and national civil servants dealing with supranational organizations.

Drawing on research from the administrative sciences and using organizational, institutional and decision-making theories, this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU's administrative capacities is essential to understand how it shapes European public policy.

of Justice. Throughout the course of the Handbook the expert contributors discuss whether the European Union is well equipped for the 21st century and the numerous crises it has to handle. They revisit the call for an EU reform made in the Laeken Conclusions in 2001 to verify if its objectives have been achieved by the Treaty of Lisbon and in daily practice of the EU institutions. The book also delves into the concept of a Europe of different speeds, which - according to some - is inevitable in the EU comprising 28 Member States. Overall, the assessment of the changes introduced by the Lisbon Treaty is positive, even if there are plenty of suggestions for further reforms to re-fit the EU for purpose.

The place of human rights in EU law has been a central issue in contemporary debates about the character of the European Union as a political organisation. This comprehensive and timely Handbook explores the principles underlying the development of fundamental rights norms and the way such norms operate in the case law of the Court of Justice. Leading scholars in the field discuss both the effect of rights on substantive areas of EU law and the role of EU institutions in protecting them.

The European Union has succeeded in bringing into force an impressive package of regulatory measures aiming to provide a high level of environmental protection across the EU. As a result, scholars, students and practitioners are confronted with the challenge of gaining insight into this complex legislative framework and its effects. This wide-ranging Research Handbook investigates a multitude of substantive issues including waste, nature conservation, air pollution, water quality protection, chemical substantives and genetically modified organisms. Based on contributions developed by 40 environmental law scholars, this comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour, delving into the deep concerns related to the compliance with and enforcement of EU environmental law. It also highlights the important role of civil society's use of environmental procedural rights, and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation. Shedding light on the institutional,

EU Criminal Law is perhaps the fastest-growing area of EU law. It is also one of the most contested fields of EU action, covering measures which have a significant impact on the protection of fundamental rights and the relationship between the individual and the State, while at the same time presenting a challenge to State sovereignty in the field and potentially reconfiguring significantly the relationship between Member States and the EU. The book will examine in detail the main aspects of EU criminal law, in the light of these constitutional challenges. These include: the history and institutions of EU criminal law (including the evolution of the third pillar and its relationship with EC law); harmonisation in criminal law and procedure (with emphasis on competence questions); mutual recognition in criminal matters (including the operation of the European Arrest Warrant) and accompanying measures; action by EU bodies facilitating police and judicial co-operation in criminal matters (such as Europol, Eurojust and OLAF); the collection and exchange of personal data, in particular

via EU databases and co-operation between law enforcement authorities; and the external dimension of EU action in criminal matters, including EU-US counter-terrorism co-operation. The analysis is forward-looking, taking into account the potential impact of the Lisbon Treaty on EU criminal law.
