Risk: A state of uncertainty where some of the possibilities involve a loss, catastrophe, or other undesirable outcome.

Measurement of risk: A set of possibilities each with quantified probabilities and quantified losses. Example: "There is a 40% chance the proposed oil well will be dry with a loss of \$12 million in exploratory drilling

costs".

Risk - Wikipedia

Risk is the variability in the expected return from a project. In other words, it is the degree of deviation from expected return.

Risk is associated with the possibility that realized returns will be less than the returns
