An intricately woven, suspenseful novel of psychological and political intrigue, The Tesseract follows the interlocking fates of three sets of characters in the Philippines: gangsters in a chase through the streets of Manila; a middle-class mother putting her children to bed in the suburbs and remembering her first love; and a couple of street kids and the wealthy psychiatrist who is studying their dreams. Alex Garland demonstrates the range of his extraordinary talents as a novelist in this national bestseller, a Chinese puzzle of a novel about three intersecting sets of characters in the Philippines.

Yesterday she sat in Freshman seminar... ...now she's running for her life. What's chasing Claire should not exist. She's convinced a homeless, ex-classmate is stalking her. Rob says he can travel between alternate realities, but he also claims he can shape-shift and that Claire has magic in her veins... and that only her blood has the power to unleash the great Devourer God and breach a gate that must never be opened. Rob might be crazy, but he would never hurt her. Would he? If Rob's a lunatic, then why is everyone trying to kidnap or kill her? They all want Claire's blood and a powerful warlock and his cultists are chief among them... and he's

been close to her for longer than she realizes. Claire doesn't even believe in the supernatural! That doesn't stop it from chasing her. She knows she can't run forever. But can she fight? Get it now, and beware the wolf.

A Manille aux Philippines, un jeune marin, Sean, a rendez-vous dans un hôtel miteux avec un gangster métis redoutable et redouté. Son destin va croiser celui de Rosa, une femme médecin mariée et mère de deux enfants, et celui d'un gamin de 13 ans, qui mendie le long des trottoirs de la grande cité asiatique et vend le récit de ses rêves à un curieux psychologue qui connaît la définition du " tesseract ". Après La Plage, qui a révélé le grand talent d'Alex Garland et sera prochainement adapté au cinéma, Tesseract est lui aussi un " thriller exotique ". On y retrouvera les mêmes séductions et la confirmation du pouvoir de ce jeune romancier à construire une forte intrigue romanesque.

Mark Johnson, a young executive in the great Tyson financial empire, is charged with an unusual and dangerous assignment--to bring peace to one planet and discord to another, to save both civilizations from destruction

Tasman is born into a world populated by two-headed bicephalic "twins" who share one body. Alone, she struggles for acceptance and becomes the unwitting key to the Earth's salvation, in a poetic and apocalyptic vision of the future where technology exists as a mere remnant of a destroyed world, conjoined twins are the norm and the orbit of the moon is decaying.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Le "tesseract " est une composition géométrique complexe, dérivée de l'hypercube. Entre les personnages et les intrigues de ce roman, les points de rencontre et de croisement dessinent idéalement cette figure. Un marin aux prises avec un racketteur, dans un hôtel miteux de Manille. Une femme médecin, mariée, hantée par le souvenir d'un premier amour. Deux gamins des rues qui racontent leurs rêves nocturnes à un étrange psychologue... Dans l'ambiance trépidante, oppressante, de la capitale philippine, tous vont être les protagonistes d'une aventure étrange, au suspense d'un genre nouveau, plus captivant que celui de bien des thrillers. Après La Plage, grand succès de librairie, voici le nouveau roman d'un auteur anglais à situer peut-être dans la parenté de Paul Auster, et avec lequel, assurément, il va falloir compter.

This children's book explains the features of a tesseract, wheels within wheels, and a sphere within a sphere all within the context of dimensions. Explore the 0th-4th dimensions with their

unique points of view. Imagine what it would be like to exist in each dimension. What can you do? Where can you go? What shapes can exist? Ultimately, answering these questions can lead to a discovery of scientific concepts beyond the daily reality and above the mundane routines of life.
