Exposes major news stories ignored by the press in 2003 and 2004.

The End of Print is the first collection of the work of David Carson, arguably the most innovative and influential graphic designer of the 1990s. Since the book first appeared in 1995, it has become one of the most popular graphic design books of the 20th century. Carson's approach to typography and layout has provoked praise and criticism worldwide, and has inspired a following of young designers eager to break with tradition and forge a new aesthetic. This revised and extended edition contains a significant number of new images from his key period in Carson's career. Two illustrated essays provide an overview of Carson's work, setting it in the context of graphic design history. They examine critical appraisals of the book and discuss the impact that Carson's work has had on contemporary graphics. The much-debated concept of the 'end of print' is explored in new contributions from Douglas Coupland, Jessica Helfand, Rick Valicenti, Shawn Wolfe, Geof Kern, Jackson Boelts and Philip B. Meggs. The End of Print is illustrated with 400 colour images, and features work from the magazines where Carson first made his mark - including Transworld Skateboarding, Surfer, Beach Culture and Ray Gun - as well as his instantly recognizable advertisements for clients such as Nike, Pepsi, MTV and Sony. Lewis Blackwell's text includes an interview in which Carson examines the origins of his approach and discusses the extreme reactions to his work.

Now in it's second printing, Fuck You Heroes is photographer Glen E. Friedman's uncompromising look at the radicals of youth culture in the extreme worlds of skateboarding, punk and rap. From day one behind his camera, Friedman has had an unerring ability to be in the right place ahead of everybody else. He was a teenaged photographer for 'Thrasher' and 'Skateboarder' magazines, he created the seminal one-hit punk fanzine 'My Rules', worked with Black Flag and Suicidal Tendencies in their early days, wrote for Maximum Rock & Roll, did street promotion for Def Jam's west coast office and shot sleeve photos for everyone from Minor Threat to Public Enemy. This book presents the photographic distillation of Glen's ethic: it's about the perfect shots of the people who live by the touchstones of intensity and integrity.

Chronicles the history of skateboarding, from its creation in the 1960s to the popularization of freestyle skateboarding and its development as a professional sport.

Business doesn't have to be boring! The Executive's Almanac is the Schott's Miscellany of business trivia, chock-full of surprising facts, lists, anecdotes, histories, diagrams, and more. We bet you didn't know that: Adidas and Puma are competing companies owned by estranged brothers, both headquartered in the German mill town of Herzogenaurach. 314 acres of trees go into every Sunday edition of the New York Times. Soichiro Honda quit the company that bears his name because he lost his sexual potency and his ability to consume large amounts of alcohol. With whimsical illustrations and a unique design inspired by the Wall Street Journal, this lively companion will appeal to every business executive (and aspiring executive) in your life.

Exposes major news stories ignored by the press in 2003 and 2004.

When you're a kid, all you want to do is skate. Jobs, rent, relationships, student loans, "your future," whether or not the door person at the bar you're going to after skating will let you in with your board--none of these things matter. As you get older there are more things to worry about and less time to take care of them all. Everyone reaches a point when they can no longer skate for 10 hours straight. Being a kid pushing around the city with little concern for time, you learn to make your money stretch. When your pockets only contain some loose change, a Metrocard, and nuggets of wax, the quarter snack from the bodega is the most viable option. Once you can afford actual meals and overpriced New York rent, the quarter snack becomes a symbol of a simpler time, back when you were content with skating on a diet that could lead to diabetes if not phased out by 19. That's when things were a lot more fun. Quartersnacks, an online epicenter for the skate culture of downtown New York, never cared about "best-of-the-best skateboarding." Instead, with acute self-awareness and biting humor, it chronicles the exploits of everyone bound together by a common interest in skateboarding in New York. Life isn't a high school movie where a crew of the best skaters in town exclusively skates together and terrorizes the losers. In New York everyone skates with everyone else--"talent" is secondary. Quartersnacks captures the energy of a session in the city with your childhood friends, some younger kids you just met just last year when they moved here for college, their friends visiting from out of town, and some token pros, all skating together. In the ten years that Quartersnacks has been active, New York has become a national hub for skateboarding (at least in the warm months) and more kids are skating worldwide than ever. Quartersnacks: 10 Years Down collects the best and worst from the site, along with new interviews, and documentation of the spots, the videos, the shops, and everything else that has changed and remained the same in New York skating in the past decade.

'The second edition of Understanding the Media updates what has been recognised as a successful introduction to the study of the mass media.... The author furnishes examples from all around the world, underpinning the emphasis the book places on the concept of globalisation in understanding the modern media. The readings and questions force students to reflect critically on issues and encourage them to explore their own media-consumption habits.... The chapters are well organised and user friendly, with the chapter on globalisation highly recommended. Introductions to media globalisation often fail to provide a succinct and clear overview for first-year students - this chapter cracks the problem with a pithy description of the basic concepts and debates, interlaced with illuminating case studies and illustrative examples... The strength of Eoin Devereux's text is that the examples are familiar and relevant to present-day students and his style does not patronise or talk down to them.... Clearly written, comprehensive, well organised and up to date... This is an excellent introductory text for media studies students' - Times Higher Education Praise for the first edition: "An interesting book to read, written in a simple and transparent style and interlaced with topical, up-to-date examples of media events" - Journal of Educational Media "This is...a well-organized, well-informed, student-friendly textbook, ideal for first-year undergraduates as a kicking-off point into the field of media and communications research. It deserves to be widely taken up" - European Journal of Communication Understanding the Media introduces key theoretical issues in media analysis and encourages students to use case studies to examine their own personal media use and exposure. Devereux applies a model of media analysis that gives equal weight to the production, content and reception of media texts. A particular emphasis is placed on understanding the mass media in a social context, and readers are invited to engage with a variety of questions about the increasingly complex mediascape in which we live our everyday lives. Now thoroughly revised and expanded this Second Edition: * Includes an additional chapter which draws together the book's key themes. * Contains new and revised case studies with expanded discussions on media audiences and fandom and 'blogging' * New and revised extracted readings in every chapter * In addition, the book is now accompanied by an ancillary website with resources for students as well as slides for tutorials/lectures. Each chapter contains concise summaries, exercises, extracts from experts in the field, model exam and essay questions, as well as directions for further reading and research. This practical dimension to Understanding the Media will ensure that the book appeals to both teachers and students of the media in the 21st Century.

In 1989 Marc McKee got his start creating skateboard graphics for World Industries and many of its subsidiaries, like Blind, 101, Menace, A-Team and Almost. Spearheaded by McKee, this era is considered the golden age of skateboard art, whose funny, sexy and offensive graphics were hugely popular then and are considered highly collectible today. McKee was also the editor of Big Brother Magazine during its first four years and later worked on the Blunt Snowboard Magazine, before selling both to Larry Flynt Publications.
